SUMMARY

AI & Data Science undergraduate at Zagazig University (Class of 2029), working toward machine learning. My hands-on work so far is in analytics: I led a four-person capstone and personally delivered the whole four-page Power BI platform over 31,653 rail transactions — star schema, DAX layer, every report page, and the design system. Looking for an internship where I can build on that foundation and grow into AI work.

EDUCATION

B.Sc. Computers and Information — Artificial Intelligence & Data Science

2025 – 2029 (expected)

Zagazig University, Egypt

Relevant coursework: Programming (C++), Statistics & Probability, Linear Algebra

EXPERIENCE

AI Data Annotator — Outlier.ai

Mar 2025 – May 2025

Remote, contract

- Annotated and quality-checked data used in large language model development workflows, applying detailed task rubrics to ambiguous and edge-case model outputs
- Reviewed roughly 100 samples per week against accuracy and consistency standards under continuous external review, flagging errors before data entered downstream training pipelines

PROJECTS

UK Train Rides Analytics Platform — Team Lead

DEPI Graduation Project

Power BI · DAX · Star Schema Modeling — github.com/Eyad-Ahmed-Kamal/UK-Train-Rides-Analysis

- Planned and scoped a four-person capstone — task breakdown, tool split, and delivery sequence — then personally built the entire four-page Power BI platform over 31,653 UK rail transactions (Jan–Apr 2024)
- Architected the star schema data model (1 fact table + 5 dimensions with surrogate keys) and authored every DAX measure behind the report, from headline KPIs to route-level delay rates
- Built the Executive Summary as five headline KPIs (£741.9K revenue, 86.8% on-time, 5.9% cancellation rate) above trend, geographic, and ranking views, so the state of the business reads in one screen
- Designed a persistent navigation bar with two global slicers across all four pages and a semantic color system — blue on-time, amber delayed, red cancelled — applied consistently throughout

COMPETITIONS

Egyptian Collegiate Programming Contest (ECPC) 2026 — ICPC Qualifications

Aug 2026

- Competed for Zagazig University in a three-person team under standard ICPC rules — one shared machine, fixed time limit — and was awarded Honorable Mention by the ICPC Foundation (certificate signed by William B. Poucher, ICPC Executive Director)

TRAINING

Digital Egypt Pioneers Initiative (DEPI) — Data Analysis Track

2025 – Aug 2026

Government-sponsored program in Power BI, business intelligence, and data analysis workflows; graduated via a mentor-reviewed team capstone project.

Introduction to AI & Data Science — British University in Egypt (BUE)

2025

SKILLS

Business Intelligence: Power BI, DAX, Data Modeling (Star Schema, surrogate keys), Advanced Excel, Dashboard & Report Design

Programming: C++, Python (foundational), SQL (foundational)

Collaboration: Team leadership, design systems, QA & integration, cross-tool coordination

Currently Developing: Algorithms & problem solving (C++), SQL for analytics

Languages: Arabic (Native), English (Professional Working Proficiency)
